

VAHLE Powercom®

VAHLE Powercom® 485

Type	Transfer speed	Transfer length	Powercom® devices per segment	Description	Order number
VAHLE Powercom® 485 230 V	19.2 kbps	up to 5000 m	64	Additional interfaces: Allen-Bradley DH 485, MODBUS Operating voltage: 230 optionally 115 Volt (± 10 %), 50/60 Hz Weight: 1100 g	910 108
VAHLE Powercom® 485 115 V	19.2 kbps	up to 5000 m	64		910 109

VAHLE Powercom® 485 HD TWIN

Type	Transfer speed	Transfer length	Powercom® devices per segment	Description	Order number
VAHLE Powercom® 485 HD TWIN	28.8 bis 187.5 kbps (adjustable)	up to 200 m ⁽¹⁾	16 ⁽¹⁾	Display/operation, diagnostic adjustment, channel display, output status display, sensivity adjustment Operating voltage: 115 - 230 V (Multi voltage power supply unit), 50/60 Hz Weight: 850 g	910 126

⁽¹⁾ Standard values - higher number of participants or length of segment on request

Further technical details about VAHLE Powercom® 485 and VAHLE Powercom® 485 HD TWIN

Transfer mode: Half-duplex, Interface: RS 485, 11 Bit (transparent protocol), PROFIBUS-DP and FMS acc. to EN 50170 Volume 2, PROFISAFE, MPI, Suconet, Number of BUS participants: according to BUS specification, Type of wire (connection to interface): according to BUS specification, Typ of wire (connection to and from the

conductor line): shielded power cable, double current collector, Voltage drop: 10 % max., Operating temperature: -20 ° bis + 50 °C, Housing dimension: 85 x 117 x 110 mm (WxHxD)

VAHLE Powercom® Double filter

with VAHLE conductor bars

SYSTEMS IN MOTION

VAHLE Powercom®

VAHLE Powercom® – Data transmission systems in conjunction with VAHLE conductor bars or sliprings were developed for automated handling systems in material flow technology. They enable the uninterrupted and cost effective data transfer between the central control system and the accompanying automation devices on the conveying vehicles.

19.2 kbps

VAHLE Powercom® 485

- RS 485 Interface (transparent protocol)
- to be used in various BUS-Systems (see page 6)
- Transfer rate 19.2 kbps

187.5 kbps

VAHLE Powercom® 485 HD TWIN

- SRS 485 Interface (transparent protocol)
- ito be used in various BUS-Systems (refer to fould-out page)
- Transfer rate from 28.8 upto 187.5 kbps (adjustable)

Other VAHLE data transmission systems

187.5 kbps

VAHLE Powercom® CPS®

- data transmission via CPS® system (inductive energy transfer)
- also available as stand alone solution
- for more information see Cat. CPS® (5a)

2 x 10 mbps

SMG (Slotted Microwave Guide)

- interference free transmission via the slotted microwave guide
- also available as stand alone solution
- no interference by radio systems
- for more in information see Cat. SMG (6b)

Advantages of VAHLE Powercom®

VAHLE Powercom® is a modem for reliable data transfer in half-duplex via conductor bars or slipring assemblies. It has a RS 485 interface as a standard, is transparent and does not require BUS-addressing.

- **reliable:** due to the special VAHLE technology, a self-cleaning effect arises, which ensures fault-free operation
- **fast:** direct data transfer (max. 2-3 bit delay)
- **simple:** install the VAHLE Powercom® 485 and begin data transfer (plug and play)
- **adapted:** VAHLE Powercom® 485 HD with VAHLE installation engineering and assembly

Powercom® HD TWIN for systems with one segment

Powercom® HD TWIN for systems with two or more segments

Example of use

Your benefit with VAHLE Powercom®

Transfer cars

- all types of conductor bars can be used (e.g. enclosed conductor systems)
- one conductor bar for power and data transmission
- highest availability even with the use of spring operated and motorized cable reels

Sewage installations

- cost-effective and reliable data transmission via conductor bars or spring-operated and motor powered cable reels
- interference-proof even in case of many parallel systems on the installation

Hangar systems

- highest availability for the use of powerail enclosed conductor systems (power and track) also for parallel routing
- good accessibility due to switch cabinet installation
- also in conjunction with the APOS® positioning system

Suspended tub trolley

- power and data transfer within one conductor system
- use of track switches unproblematic
- large installation lengths possible
- large number of consumers
- complex track layout possible
- also in conjunction with the APOS® positioning system

AS/RS Warehouse systems

- one conductor system for power, data and APOS® positioning
- no energy chain required
- no travel speed limitation
- high data transmission rate
- highest availability in difficult ambient conditions

EMS

- complete „C1“ conformity
- complex track layouts can be realised, also for track switches, lifting stations etc.
- segmenting, also for larger installation lengths
- high number of consumers
- highest availability
- also in conjunction with the APOS® positioning system
- insensitive to dirt
